Design an array garden. Describe what plants you would grow and why. Sketch out the garden and label your plants.	Find a recipe and change one ingredient in the recipe to make it your own. Escoge una receta, cambiale un ingrediente para que se tu propia receta	Make a map of your room. Identify North, South, East and West in your room.	Follow a YouTube drawing tutorial for kids https://youtu.be/6WFY7Afi8_w **Then retell the steps to someone at home or record your steps on the voice recorder app on your phone	Create flashcards and memorize your 9's multiplication facts. Then challenge a family member to see who is the fastest in solving their math facts.

**Listen-retell is a straightforward strategy that assesses student comprehension while working to develop learners' listening and speaking skills. For this exercise, students work in pairs. Facilitator/parent gives each pair a prompt that is relevant to a topic being studied. One student from each pair responds to the prompt. The other student listens carefully to his or her partner's response. Then, the listening partner rephrases what was said. The first partner confirms the accuracy of the listening partner's retell. For older or more advanced students, the listening partner will rephrase the speaking partner's statement and then add on to the conversation with a new statement. After both partners have contributed, a new prompt is issued and students' speaking/listening roles are reversed.

**The 10-2 strategy helps language learners comprehend and process auditory information. Facilitator/parent presents information verbally, making sure to pause every 10 minutes or less. At this time, students are given at least 2 minutes of processing time. Processing activities may include partner-pair-share, small group discussion, writing to a prompt, note taking or other means of synthesizing oral input. This process continues until the auditory information has been relayed.

Secondary

Journal Assignment: Write at least 3 entries per week.

Each entry should be your own words, thoughts, and feelings. Your entry can include a drawing, doodle, or printed photo. These prompts range from questions to statements, maybe quotes or even just a single word - you can interpret the prompt in any way you see fit. Some of the prompts may seem negative, but you can spin them into a positive (or vice/versa). The prompts are yours: play, explore and create.

How you respond to the prompt is completely up to you. Draw a picture, write a story, write a poem, take photographs, alter images, write music, find artifacts around your house that can be cut out and pasted into your journal. If you don't like what you have, paste a new piece of paper over the top of it and start again. The best way to do this journal is to just do it. Don't be afraid to make mistakes. This journal is not a product, it is a process.

Choose a different prompt for each entry of the week:

- Create your "This Book Belongs to..." Page
- Shelter in Place – What are other circumstances in which this order would be applicable?
- If you were quarantined on a deserted island, what three things would you bring?
- FOOD! Everything you eat and drink over time matters. The right mix can help you be healthier now and in the future if you were to bunker down for two weeks what would be the foods you would buy in preparation and why?
- What is the music that motivates you, and what does it motivate you to do?
- Where is your dream travel destination?

Vocabulary/Definitions: 5 words per week

**In addition to the journal, please watch 2 of the educational programs on OETA channel 13; while watching come up with a list of 5 words that you are unfamiliar with. Find the definition and learn the word. Try to use these words in the next week's journaling.

Tarea de Diario: Escribe por lo menos 3 diarios por semana.

Cada diario deberá ser escrito en tus propias palabras, tus sentimientos y tus pensamientos. Puedes incluir dibujos, garabatos o fotos. Los temas que te daremos a escribir serán preguntas, frases, o palabras, tu puedes interpretarlas de cualquier manera. Algunos de los temas parecerán negativas pero tu las puedes cambiar a algo positivo y viceversa.

Tu tienes la libertad de jugar, explorar y crear con cada uno de los temas. Puedes dibujar, escribir una historia, escribir poemas, tomar fotografías, escribir música, usar artículos que encuentres en tu casa. Y si terminas y no te gusta lo que hiciste solo comienza de nuevo en otro diario. No tengas miedo de cometer errores, la mejor manera de empezar un diario es hacerlo. Lo importante es el proceso y no el producto terminado.

Estos son los temas a escoger cada semana:

- Crear tu página “Este libro pertenece a”
- Quédate en Casa- En que otra situación sería esta estrategia necesaria?
- ¿Si estuvieras en cuarentena en una isla desierta, cuáles son tres cosas que traerías contigo?
- COMIDA! Todo lo que comes importa. La proporción apropiada de comidas te ayuda a mantenerte saludable. Si te vas a quedar en casa por dos semanas que comidas preparadas para comer?
- ¿Que tipo de música te motiva, y qué es lo que te motiva a hacer?
- ¿A qué lugar te gustaría viajar?

Ve 2 de los programas educativos en OETA canal 13; haz una lista de 5 palabras que no conoces. Busca la definición y trata de usar esas palabras en tu diario de la semana.

Semana Abril 13 - Abril 17

<p>Use playing cards to play this game: Lay out 20 cards on the table (leave out face cards or change them to equal 0, while aces equal 1). Kids remove sets of cards that add up to 10, ultimately trying to remove all the cards from the table. It's harder than you think!</p> <p>Utiliza cartas de juego para jugar: pon 20 cartas en la mesa, (no incluyas las cartas con figuras). Jugadores tomas las cartas que suman 10 hasta que se acaben todas las cartas. Es más difícil de lo que te imaginas! Cuando termines dile a alguien tu estrategia</p>	<p>War is one of the original math card games, but this version adds a fraction aspect. Remove face cards. Students deal two cards, a numerator and denominator, then determine whose fraction is the largest. The winner keeps all four cards, and play continues until the cards are gone</p>	<p>Give your flash cards a rest and practice facts with math card games instead. Simply lay down two cards from the deck (remove the face cards first) and add, subtract, or multiply them. Kids can work on this alone, or you can make it a contest to see who can call out the correct answer first</p>	<p>To play Close Call, remove face cards, each player deals themselves four cards then determines how to arrange them so they make two two-digit numbers that add up close to 100 without going over. For a subtraction version, work to get as close to zero as possible.</p>	<p>Use order of operations to get to 24: Each player is dealt four cards, then uses the order-of-operations rules to try to make a number as close to 24 as possible. Simple but challenging! .24 Math Game is Great Fun And Boosts Kid's Math And Critical Thinking Skills.</p>
