EduSkills

Unique English Learner Services

Service Overview

Founded in 2011, EduSkills (EDS) provides a unique set of cloud-based solutions specifically developed to support administrators and educators in their instruction of English Learners (EL).

With easy access to EduSkills' specific learning plans for each EL, educators have resources and support to provide guidance on how best to serve ELs in their classrooms. EduSkills' English Language Acquisition Plan (ELAP) Generator services automatically create individualized language learning plans for each EL based on content and language standards. These services also allow users to generate parent letters and manage the proficiency monitoring process to ensure compliance with federal and state Title III/EL regulations.

Additionally, EduSkills enhances the EL educator experience through new and exciting student and classroom level support services. For example, EL educators and administrators are able to run detailed data analytics to support program planning decisions while gaining access to an extensive bank of resources and activities specifically designed to support content area teachers meet the instructional needs of their ELs.

EduSkills' Classroom ScoreCard services work in tandem with Instructional Coach services to provide a dynamic, current view of the student's status. Reporting via "Red Light Green Light" presentation helps educators easily identify students who may require targeted remediation and includes recommendations for classroom and state test accommodations. Individual student test score history reporting for language proficiency assessments and state academic assessments is also provided.

EduSkills' Forms Management services are utilized by districts for processing forms like the Home Language Survey (HLS) to initiate the identification of potential ELs. HLS Scanning and Processing services allow schools to scan and upload HLS forms to the EduSkills cloud-database where the EduSkills team processes the forms. These services are designed to reduce the amount of time educators spend on paperwork while maximizing funding. On average, district's have realized funding increases exceeding 10% by utilizing the EDS Forms Management services.

EDS Support

EDS works along-side district personnel to provide implementation and user support. We also provide on-site support and recommendations on how to best utilize EL data in the classroom. As numerous districts can attest, EduSkills is more than a service and a software company; **EduSkills is your proven EL Services partner.**
